

Ahnaf Taiyeb

Aspiring Full-Stack Developer — Software Engineer

[GitHub](#) — [Portfolio](#) — [LinkedIn](#) — ahnaf.taiyeb@gmail.com

Professional Summary

B.Sc. in CSE graduate with hands-on experience in Full-stack development using React, Next.js, Python, and Django. Expert in building RESTful APIs, modern state management, and scalable web architectures. Proven ability to implement asynchronous processing and secure authentication systems. Actively refining problem-solving skills on LeetCode and Codeforces.

Technical Skills

Languages: JavaScript (ES6+), Python, C, C++

Frontend: React, Next.js, Redux Toolkit, TanStack Query, Zustand, Tailwind CSS, GSAP, Shadcn UI

Backend: Django, Django REST Framework (DRF), JWT Auth, Celery, Redis

Databases & Tools: PostgreSQL, MySQL, Git, GitHub, Cloudinary, Firebase

Projects

Sync – Full-Stack Social Media Platform — [Live Website](#), [Backend](#), [GitHub](#)

Next.js, Django REST Framework, TanStack Query, Celery, PostgreSQL

- Developed a high-performance social platform using a decoupled architecture with **Next.js** and **DRF**.
- Engineered a real-time engagement system with nested comment threading and optimized database annotations.
- Integrated **TanStack Query** for efficient server-state management, caching, and optimistic UI updates.
- Built an async media pipeline using **Celery** and **Redis** for **Cloudinary** uploads, reducing latency by 40%.
- Implemented secure **Jwt** authentication with sliding-window token refresh logic and **Zustand** state management.
- Built a global unified search engine and a CM dashboard for drafts, scheduled posts, and archives.

Creative Portfolio – Ahmed Digital — [Live Website](#)

Next.js, GSAP, Tailwind CSS, SEO Optimization

- Developed a modern, high-conversion portfolio for a creative agency to showcase video projects.
- Implemented complex scroll-triggered animations and interactive UI components using **GSAP**.
- Optimized performance and SEO, resulting in increased international client reach and inquiries.

AI Framework for Email-to-Calendar Scheduling — *Python, NLP, Gemini LLM, Google API*

- Developed an AI-powered system to automate meeting scheduling by extracting intent from emails.
- Implemented constraint-aware conflict detection and working-hour validation logic.
- Integrated Gemini LLM for multilingual NLP support and automated conversational responses.

Education

B.Sc. in Computer Science & Engineering (CSE) — Canadian University of Bangladesh

2022 – 2025

CGPA: 3.65

Member, CUB CSE Computer Society

Certifications & Learning

- **Full Stack Development (Python, Django, React)** – Interactive Cares [\(View Certificate\)](#)
- **Complete Django Mastery** – CodeWithMosh — **CSE Fundamentals** – Phitron
